

Where Digital and Print Worlds Converge

Now in its tenth year as a global innovator in usability focused on-screen reading technology and digital distribution management, ION Systems provides scalable, integrated solutions and services that help digital content owners build and enhance relationships with all consumers of content. ION Systems' patented on-screen reading technology turns digital content into fully usable, consumable information for all audiences - sighted, low-vision, dyslexic, scotopic and blind.

ION = Readability + Usability + Management

eMonocle™ - ION's patented on-screen reading interface facilitates the efficient reading of complex content. eMonocle creates a user customizable reading environment with special accommodations for sighted, low-vision, dyslexic, scotopic and blind readers, instant font resizing (from 4 to 144 points), non-scrolling text, dynamic column formation, graphics zooming and panning, and enforcement of publisher-defined digital rights. A free download version of eMonocle is available at <http://www.ionsystems.com/emonocle/>.

Reading + Accessibility + Usability

Reading + Web Content Rendering

Web Eyes™ - an Internet Explorer browser plug-in that automatically converts any web page into a separate, yet synchronized window with ION's patented on-screen reading interface. User controlled font sizing and logical reflow transforms any web page into a superior on-screen reading experience while exceeding ADA and Section 508 accessibility guidelines.

GalaxyLibrary™ - ION's end-to-end digital content management and distribution service provides content owners of audio, video, text and still images, solutions to protect, distribute and sell content in numerous business models. Total control of 22 formats (most automatically converted) with 4 DRM choices means GalaxyLibrary is your one-stop-shop for all intellectual property needs. The industry's only secure "free read" feature allows the entire contents to be viewed for X minutes. Retail, wholesale, subscriptions, book clubs, libraries, private libraries, print, electronic, Braille ...GalaxyLibrary has it all.

GALAXY LIBRARY
Reading + Intellectual Rights Protection
