

Segment Your Content,  
Segment Your Market  
With GalaxyLibrary's  
Customizable ePublishing Solutions

**Reach new markets**

**Streamline customer relationships**

**Control what content is accessed by whom**

## Planet Retailer

Add GalaxyLibrary's powerful eContent publishing and distribution system to your organization's infrastructure, while maintaining your web site's unique look and feel. For a one-time setup fee, you can increase your revenue by:

- Earning 67% of the retail price for each sale of your own publications
- Earning 21% of the retail price for the sale of select categories of content from the GalaxyLibrary repository.
- Expanding the purchasing options of your existing customer base (besides hard copy, you can offer your customers 22 different reading options for download to a personal computer, handheld device, and much more)
- Increasing your customer base by reaching new audiences with your publications

The GalaxyLibrary intuitive backend system provides advanced conversion tools, distribution in 22 different formats/devices, 4 DRM choices, sales in multiple currencies, 24x7 reporting, and monthly royalty payments.

## Galaxy Private Library

A Galaxy Private Library is a segmentation of the GalaxyLibrary™ repository, offering a customizable turnkey platform that allows you to host, manage, control, and/or sell content from a uniquely designed, self-created web site. You control the distribution and pricing over all types of digital and print content .

- Distribute content securely and economically
- Enable private access to content
- Provide control over subscriber lists
- Enable Web access to select content
- Segment content to different audiences
- Provide supplementary benefits to members
- Provide immediate access to time-sensitive information
- Set different prices for the same content
- Pay by subscription or transaction
- Educate and inform the public with freely available information from the homepage

**Galaxy Private Library**  
**Empowering your business to succeed**

GalaxyLibrary content delivery meets and exceeds both Section 508 and ADA accessibility requirements, including delivering Braille.
