

WebEyes™

An Internet Explorer browser plug-in that automatically converts any web page into a separate, yet synchronized window with ION's patented on-screen reading interface. User controlled font sizing and logical reflow transforms any web page into a superior on-screen reading experience while exceeding ADA and Section 508 accessibility guidelines.

Accessibility for low-vision and dyslexic users
Enhanced readability for sighted users
Usability for all!

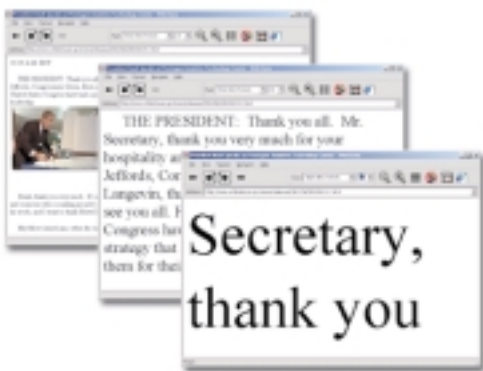

Web Eyes™ is designed to meet the emerging usability needs of digital content (accessibility and consumption), delivering a solution that enables access to content on demand and automatically rendering web pages accessible and readable.

Reading + Web Content Rendering

Web Eyes™ is a browser plug-in that allows the user to adjust the font size of all content on the web site up to 144 point font size. All text is then logically reflowed within the browser window, with the user "turning" pages instead of the tedious, eye-straining effort of reading scrolling text. Web Eyes™ allows pages to be graphically more appealing (and more usable) to sighted users and immensely accessible to the visually impaired.

Web Eyes™ is based on ION's unique patented interface and biomechanical solutions that make reading digital content easy and logical, while enhancing the user's immersive reading experience.

- Logical reflowing of text, before and after resizing, reduces strain on the eye and maintains the content's sequential ordering.
- The Internet Explorer browser and Web Eyes™ stay in constant synchronization, regardless of which one is currently in the forefront, thus providing maximum usability.
- Graphics and columns can be enabled or disabled with a click of a button.
- User-driven font sizing (4 point to 144 points), providing comfort at any reading distance.
- Keyboard and mouse independent navigation supports all disability-compliance standards, allowing users who are dependent on one navigation modality to use Web Eyes™.
- Web Eyes™ renders content into one or multiple columns (an optional functionality) of easily readable information. Columns automatically adjust according to font size selected. Moving sequentially through pages completely eliminates eye fatiguing scrolling and provides a natural reading experience.

Web Eyes™ greatly benefits your organization by enabling allowing your customers/employees to comfortably and efficiently access information on the Internet.
